

I would ask you to take a few minutes to consider with me what you have at stake in the 2010 Election.

Washington D.C. is totally out of touch with the vast majority of us. Our country is in great jeopardy and our current Congressman is passive and content to vote the Democratic Party line that is taking us down the road to ruin.

In 2010 we will decide if our nation can be preserved as a beacon of hope to the world or if it will continue on a certain path toward socialism and economic stagnation.

Our founding fathers were wise. They were faithful in giving to us a political and economic system that has become the envy of the world. Today this system is under a great attack from within.

This attack comes from the liberal elite who believe that spending and wasting massive amounts of money while going ever deeper in debt is the answer to every problem. You and I know that we are in serious trouble. Borrowing, taxing and incessant spending is only digging a deeper economic hole.

Not content with commandeering the golden eggs of the American economic engine, the Democrats seem hell bent on killing the goose that lays those golden eggs and creating an economic disaster that will take the next two generations from which to emerge.

Congress has turned a deaf ear to us! Our leaders won't even listen to us when we come to their listening sessions but ridicule and scorn us.

Congress at one time worked for us but now seems to care more about special interest groups than the people they were elected to serve. Government now maneuvers to become our master, while making us its servants?

Congress passes stimulus packages and bailout schemes at a cost that will reach into the trillions of dollars. You and I and our children and our children's children are paying for the million dollar bonuses given to executives that run those failed companies receiving much of this, so called, stimulus money.

With reported unemployment at 10% and hidden unemployment probably near 18% we need true job creation not Washington's smoke and mirrors approach. Without jobs there can be no sustained recovery.

Over, please...

Page Two

Earlier this summer I traveled the 8th Congressional District, listening to the people and you have had some pretty good questions:

Why did Congress pass a cap and trade bill that will cost our country two million jobs?

Why does Congress want to pass a health care bill that increases costs, limits choices and punishes seniors by cutting Medicare?

Why does Congress vote on legislation without even first reading it and often refuses to make proposed legislation available for the people to read?

Why do Democrats in Madison and Washington think they no longer have to listen to us?

And why do they believe they can spend us into prosperity? It doesn't work that way. I believe we need less spending, lower taxes and true job creation. We did it before under President Reagan and we can do it again and we can do it without increasing taxes or spending!

First, we can create millions of good paying jobs by simply removing needless government regulations and roadblocks that obstruct the development of all forms of clean, safe energy that are available right now within our own borders. This would greatly reduce the trade deficit, strengthen the dollar and reduce our dependence on foreign oil.

Second, we can reduce the capital gains rate that has been proven to stimulate business and promote job creation.

Third, we can remove needless government interference on small businesses which are the chief producer of jobs in the nation.

Fourth, We can stop asking working families and seniors to bail out investment companies, car companies, insurance companies, labor unions and banks. Just think of it! The Democrats have you and me paying multi-million dollar bonuses to executives of failed and often corrupt companies while we struggle to feed our families and hold on to our jobs.

Fifth, we can end efforts by the Democrats and our current Congressman to impose cap and trade legislation that will cost two million needed jobs!

Sixth, we can stop government health care and keep health issues between the patient and his or her doctor. We can provide access to all desiring health care without a huge government takeover and without spending, taxing or borrowing trillions of more dollars.

Continued..

Seventh, we can do just the opposite of what the Democrats are now doing and lower taxes and individual tax rates that, whenever tried, have always pulled us out of recession and stimulated strong recoveries.

Our Country is calling you and me!

This will be a group effort and in speaking with many of you I know you are ready and I am ready to meet this challenge. We have been appointed for such a time as this – to restore commonsense and faith in our government and economic prosperity to the nation and this we will do.

By the time you read this letter I will be returning from Iraq, where I have been stationed with the Wisconsin Air National Guard, and once again will seek your support and advice. Restoring jobs and prosperity to our nation and some good old Wisconsin commonsense to Congress should be our greatest priority.

Unless we act the America envisioned by the Democrats will ensure that our best days are behind us. But because of your concern and dedication this will not happen! We have an extraordinary opportunity to transform the federal government to the realities of the 21st century. With your support together we will do just that!

Will you join with me?

Your generous contribution of \$25, \$50, \$100, \$250, \$500, \$1,000 or more will help support your and my efforts to restore the economy and direction of our Country. We will win this important election!

Sincerely,

Representative Roger Roth

PS – We have a great nation. We must work together to keep it that way. If you will put your confidence in me I promise you I will be #1 in Congress to put our Country back on the right track. I am asking you to join with me and give me the financial resources to get the job done. Will you do that? If you do I guarantee you that it will be the best investment you've ever made! Please let me hear from you. THANK YOU
